1 Hotel Descriptive Content Info API

This document captures the technical requirements needed to successfully implement Hotel Descriptive Content Info API.

1.1 Hotel Descriptive Content Info API – Overview

Hotel Descriptive Content Info API – In addition to the Hotel Search Request API, a Hotel Descriptive Content Info provides the ability to retrieve detailed information about a specific hotel such as but not limited to hotel name, address, hotel amenities, room amenities, etc. Search has to be done based on the hotel code parameter.

Note: Only one hotel code can be sent per Request.

1.2 Hotel Descriptive Content Info - Production and Staging URLs

The **Production** URL for Hotel Descriptive Content Info is:

http://api.ihg.com/hoteldescinfo?HotelCode=ATLCP&PrimaryLangID=us-US&Format=xml&apikey=<Your_API_Key_here>

The **Staging** URL for Hotel Descriptive Content Info is:

http://api.ihg.com/staging/hoteldescinfo?HotelCode=ATLCP&PrimaryLangID=en-US&Format=xml&apikey=<Your_API_Key_here>

1.3 Hotel Descriptive Content Info – General Rules (Request)

- The request for the HotelDescriptiveInfo must contain the following:
 - HotelCode
 - API Key
- A primary language ID must be specified to get the details of a hotel in a specified language.
- Only one hotel code can be sent per Request
- The Request for Hotel Descriptive Info may also contain two optional values:
 - PrimaryLangID
 - Format

1.4 Hotel Descriptive Content Info – Sample Request

Attribute	Mandatory (M)/ Optional (O)	Value set/ Example	Description
@PrimaryLangID	M	en-US	Requested Language de-DE German en-US English es-ES Spanish fr-FR French it-IT Italian ja-JA Japanese nl-BE Dutch pt-PT Portuguese zh-CN Chinese
@HotelCode	M	ATLCP	Hotel Mnemonic. Only one hotel Code can be sent per Request. IF multiple hotels are sent, the system will only return the Response for the first hotel in the Request.

1.5 Hotel Descriptive Content Info – General Rules (Response)

A Hotel Descriptive Content Info Response will contain the following elements:

- 1) **HotelInfo** – This element contains the hotel details like year built, hotel status, location, segment, position in terms of latitude and longitude, guest room information, and the services provided in the hotel.
- 2) **FacilityInfo** – Provides details about all the major facilities in a hotel like meeting rooms and their available features, guest rooms and the amenities provided in each of the rooms, and details on the list of restaurants for the hotel.

- 3) **Policies** – Hotel policy info like check in, check out times, kids stay free information, tax policies and pet policies are returned in this element.
- 4) **AreaInfo** – Provides details on the nearby attractions and recreations in the hotel area.
- 5) **ContactInfo** – Provides the main contact details of the hotel like Address, phone, email and some hotel URLs for property details, rate, image and map.
- 6) **TPA_Extensions** – Contains information like USW chain codes and special announcements from the hotel, if any. Special announcements will be listed under HotelFacts element.
- 7) **GDS Codes** – Provides the GDS codes of the property

1.6 Hotel Descriptive Content Info – Sample Response

Element	Attribute	Mandatory (M)/ Optional(O)	Value set	Description
	@PrimaryLangID	M	en-US	Requested Language
HotelDescriptiveCo ntents		O		Collection of Property information
HotelDescriptiveCo ncontent		M		List of individual property elements
	@CurrencyCode	M	USD	Monetary Unit Code. See Appendix C for the list of Currency codes.
	@UnitOfMeasureCode	M	Refer Appendix for all the supported codes.	Unit of Measure in a code format. Refer to the OTA code list - UOM – Unit of Measure Code
	@TimeZone	M	GMT;-04:00	Describes the local time zone in which the hotel is located.
	@HotelCode	M	ATLCP	Uniquely identifies a hotel property.
	@BrandCode	M	CP	A code that identifies the brand or flag of a hotel.
	@HotelName	M	Crowne Plaza ATLANTA PERIMETER AT RAVINIA	Name of the hotel property.
HotelInfo		O		Contains descriptive information about a hotel property.
	@WhenBuilt	O	1991	The year this hotel property was built.
	@HotelStatus	M	Bookable	Describes operating status of the hotel.
	@HotelStatusCode	M	Refer Appendix for	This indicated the

Element	Attribute	Mandatory (M)/ Optional(O)	Value set	Description
			all the supported codes.	operating status of the hotels to be return. Refer to OTA code List. – HST – Hotel Status Code
CategoryCodes		M		Collective descriptive information about the hotel.
LocationCategory		O		Defines the general location of the hotel.
	@Code	M	Refer Appendix for all the supported codes.	Defines the location of the hotel. Refer to OTA code List – Location Category Code - LOC
	@CodeDetail	M		Used to provide further information about the OTA Code.
SegmentCategory		O		Describes the type of hotel. Luxury, extended stay, economy.
	@Code	M	Refer Appendix for all the supported codes.	Segment Category Code. Refer to OTA Code List – Segment Category code - SEG
HotelCategory		O		Describes a particular type of hotel. (golf, ski, bed and breakfast, etc)
	@Code	M	Refer Appendix for all the supported codes.	Indicates the type of the property. Refer to OTA Code List - Property class type – PCT
GuestRoomInfo		M		The types and quantities of guest rooms at the hotels.
	@Quantity	O		Identifies the number of guest rooms available.
	@Code	M	Refer Appendix for all the supported codes.	Refer to OTA code List - Guest Room info - GRI
	@CodeDetail	M		Used to provide further detail about OTA code.
Descriptions		M		Collection of hotel information.

Element	Attribute	Mandatory (M)/ Optional(O)	Value set	Description
Description		M		The hotel description
	@ AdditionalDetailCode	M	Only 14 is supported	Indicates Additional Detail Type. Refer OTA code list ADT from appendix. Description with ADT of 14 is used to send the general tax policy of the hotel and the American Disability Act text for US hotels.
Text		M		Property description text Only one Text element is sent. Text is a multi-lingual element.
Position		O		Geo code location of the hotel property.
	@Latitude	O		Latitude value
	@Longitude	O		Longitude value.
Services		O		List of services available in this property
Service		M		A service available in this property.
	@BusinessServiceCode	O	Refer Appendix for all the supported codes.	Indicates if this is a business service. Refer to OTA code list Business Service Type – BUS
	@Code	O	Refer Appendix for all the supported codes.	Indicates the service code. Refer OTA code list HotelAmenityCode - HAC .
	@ExistsCode	M		Indicates whether this service is available.
	@CodeDetail	M		Short Description of the service.
	@ProximityCode	M	Refer Appendix for all the supported codes.	OTA Proximity code type PRX . Proximity to the property.
Features		O		Only 1 element allowed per Property message.

Element	Attribute	Mandatory (M)/ Optional(O)	Value set	Description
Feature		M		Required when Features Element is present.
	@CodeDetail	M		Feature Code detail This is meant to provide additional detail on the associated AccessibleCode or SecurityCode. CodeDetail is a multi-lingual attribute.
	@AccessibleCode	M	Refer Appendix for all the supported codes.	Accessible code. Refer to OTA codes table. (Please refer to sample below or section 5.1.2.1 for a table of possible PHY values)
	@ExistsCode	O		This provides detail for an AccessibleCode. It describes if an Accessible feature exists in the hotel or not. 1 = Yes, 2 = No, 3 = Not Applicable
Languages		O		Only 1 element allowed per Property message.
Language		M		Languages spoken in this property.
	@Language	M		Language Code. Standard ISO Language identifier.
FacilityInfo		M		Provides information pertaining to hotel facility.
MeetingRooms		O		Collection of meeting rooms comprised within the hotel.
MeetingRoom		O		Dedication or non-dedicated space.
	@RoomName	M		This is the meeting room name as provided to the guest
	@ID	M		Unique identifier for the meeting room generated by the system.
Codes		O		Codes or abbreviation

Element	Attribute	Mandatory (M)/ Optional(O)	Value set	Description
				for a meeting room.
Code		M		Meeting room code
	@Code	M	Refer Appendix for supported values	OTA Meeting Room Code (MRC).
	@ExistsCode	M		ExistCode "1" indicates that amenity or service is offered.
	@CodeDetail	M		Used to provide further information on the code.
Dimension		M		Dimension of the meeting room.
	@Area	M		Square area of the meeting room
	@Height	M		The height of the meeting room
	@Length	M		The length of the meeting room
	@Width	M		The width of the meeting room
AvailableCapacities		O		The amount of usable meeting space available at the property.
MeetingRoomCapacity		M		Measurable dimensions and capacities of meeting room.
	@MeetingRoomFormatCode	M	Refer Appendix for supported values	Code for the format of the meeting (MRF). Refer to OTA Code List.
Occupancy		M		Occupancy details of the meeting room.
	@MaxOccupancy	M		Maximum number of occupants allowed in the meeting room.
GuestRooms		O		Collection of guest room types.
GuestRoom		M		Guest room types
	@ID			Text for Unique Identifier for the Guest Room ALL - Applies to all rooms SOME - Applies to some rooms.
Amenities		M		Collection of guest room amenity items available.

Element	Attribute	Mandatory (M)/ Optional(O)	Value set	Description
Amenity		M		Room Amenity item.
	@RoomAmenityCode	M	Refer Appendix for supported values	Room Amenity Type. OTA code list (RMA).
	@IncludedRateIndicator	O		When true this will indicate that amenity is included in the room rate.
	@ExistsCode	M		Used to identify if amenity or service is offered.
	@CodeDetail	M		Used to give further details on the code.
OperationSchedules		O		Collection of times, days, and fees.
OperationSchedule		O		Operation schedule.
Charge		O		Associated charge.
	@Amount	M		Fee for amenity.
Restaurants		O		Collection of restaurants offered by the hotel.
Restaurant		M		Restaurant offered by hotel.
	@RestaurantName	M		Restaurant name
	@OfferBreakfast	M		Breakfast offering flag.
	@OfferLunch	M		Lunch offering flag.
	@ProximityCode	M	Refer Appendix for supported values	Denotes if a service is onsite, offsite.
	@Id	M		Unique identifier of restaurant generated by system.
RestaurantDescription		O		Description information about the restaurant.
	@Attire	O		Used to pass restaurant attire information.
Text		M		Restaurant Description Text is a multi-lingual element.
Policies		O		Collection of Policy information.
Policy		M		Describes the policy of the hotel.
PolicyInfo		O		Describes the policy of the hotel.
	@CheckInTime	O		The usual check-in time for the hotel
	@CheckOutTime	O		The usual check-out time for the hotel.

Element	Attribute	Mandatory (M)/ Optional(O)	Value set	Description
	@KidsStayFree	O		If this attribute is true, there is no charge for children.
	@UsualStayFreeCutOff Age	O		Usual age limit which a child can stay free at hotel facility.
PetsPolicies		O		Collection of Pet Policy information.
PetsPolicy		O		Describes the pet policy for the hotel
	@PetsPolicyCode	O	7	Detailed pet policy information. OTA code type Pets Policy Code (PET). Currently IHG will always set this as '7' ('All Pets')
Description		O		Pet Description
Text		M		Formatted Text Information
TaxPolicies		O		Collection of tax policies.
TaxPolicy		M		Describes the tax policy for the hotel
	@Amount	M	0.0	Monetary Amount. A default amount of "0.0" is sent.
	@ChargeUnit	M	12	This is the unit for which the charge applies. Refer to the OTA Code Type 'Charge Type' (CHG). Currently IHG returns '12' which denotes that charge applies per stay.
	@Code	M	41	If the tax is included in the price then code "41" is returned.
TaxDescription		M		Text description of the taxes in a given language.
Text		M		Formatted text content
AreaInfo		O		Provides information about area attractions and reference points
Attractions		O		A Collection of attraction objects identifying type

Element	Attribute	Mandatory (M)/ Optional(O)	Value set	Description
				of attraction interest in the area.
Attraction		M		Identifies an item of local interest.
	@AttractionCategoryCode	M	Refer Appendix for supported codes.	OTA Code of type of attraction Category Code (ACC).
	@AttractionName	M		The name of the local attraction.
	@Code	O		Airport Code Attribute is ONLY used when AttractionCategoryCode is "1" (Airport).
	@ID	M		Unique value assigned by creating system.
Description		O		Description about the attraction.
Text		O		Attraction description. Only one Element per Attraction. Text is a multi-lingual
Contact		O		Used to pass contact information for a given attraction.
URLs		O		Collection of URL elements used to pass detailed URL information.
URL		O		Website address
RefPoints		O		Collection of Reference points.
RefPoint		M		Provides information on the location of an area attraction.
	@Direction	O		Defines the cardinal direction.
	@DistanceUnitName	O		
	@Distance	M		Defines distance between two points.
	@PrimaryIndicator	M		Identifies if reference point is the main reference point for the specified index point.
	@CityCode	O		City Code will be set only when

Element	Attribute	Mandatory (M)/ Optional(O)	Value set	Description
				AttractionCategoryCode is '68' – (DOWNTOWN)
Transportations		O		Collection of direction of to/from location via various modes of transport.
Transportation		M		Modes of transport.
	@Amount	M		Associated cost to transportation.
	@TransportationCode	M	Refer Appendix for supported values.	OTA code List Transportation Code. (TRP).
Recreations		O		A collection of recreation objects identifying the different types of recreation facilities.
Recreation		M		Recreation facility available to the guest.
	@Code	M	Refer Appendix for supported values.	OTA code list Recreation service Type (RST).
	@CodeDetail	O		Used to provide further detail about OTA code.
	@ExistsCode	M	1	ExistsCode "1" identifies that amenity or service is offered.
	@Included	O		
	@ProximityCode	M	Refer Appendix for supported values.	Denotes whether a recreation is onsite, offsite. OTA code type Proximity (PRX)
Description		O		Description information about the recreation.
Text		M		Directions to property. Text is a multi-lingual element.
ContactInfos		O		Hotel Contact Information
ContactInfo		M		Contact Information item.
Addresses		M		Hotel Addresses available.
Address		M		Hotel address.
	@UseType	O		Address usage type.
AddressLine		M		Street Address line.
CityName		M		City Name.
CountryName		M		Country Name.

Element	Attribute	Mandatory (M)/ Optional(O)	Value set	Description
PostalCode		M		Postal code.
StateProv		M		State or Province name.
Phones		M		Phone numbers available for the property.
Phone		M		Phone detail
	@AreaCityCode	M		Area code.
	@PhoneNumber	M		Phone number
	@PhoneTechType	M		Type of phone number.
	@PhoneLocationType	M		Phone Location type.
Emails		O		Emails addresses for the contact.
Email		M		Email address
	@EmailType	M		Type of email address.
URLs		O		URLs available for the hotel
URL		M	http://ichotelsgroup.com/redirect?path=hd&localeCode=fr&hotelCode=atlcp	URL showing the web address
	@Type	M	RATE, IMAGE, PROPERTY DETAILS, MAP	Type of the URL
GDS_Info		O		GDS information for this hotel property.
GDS_Codes		O		GDS Codes for hotel property.
GDS_Code		M		GDS information for this hotel property.
	@Chain_Code	M		GDS Chain code for this hotel property.
	@GDS_PropertyCode	M		GDS Property code for this hotel property.
	@GDS_Name	M		Name of the GDS.

2.2 APPENDIX B – Physically Challenged Code

Below is a table describing all “physically challenged” codes that could exist in the response. The @AccessibleCode describes the OTA code, or if it starts with an “I”, the IHG specific code. The @ExistsCode describes if the feature exists or not in the hotel, and the @CodeDetail gives a description of the item which is subject to change. Each table is grouped by the type of physically challenged detail.

1. Public Area Accessibility

Description	@CodeDetail (This is subject to change)	@AccessibleCode (OTA code)
Hotel Entrance is ADA Accessible	Public Entrance	129
Route from Accessible Public Entrance to Registration Area is Accessible	Registration Desk	130
